## Purpose

This STR (Software Test Report) presents findings referring to the tests done on the website "www.wobi.co.il".

The tests were carried out in the main functions of the site such as: displaying menus, submitting a request to a representative on various topics, purchasing various insurances, navigating the site, reading information and understanding it, and other various features.

## Application overview

The "Wobi" website is mainly used for comparing prices and purchasing various insurances such as: car insurance, travel insurance abroad, home insurance, mortgage insurance, health and life insurance.

## Testing Scope

The scope of the tests I performed in the following parts of the site:

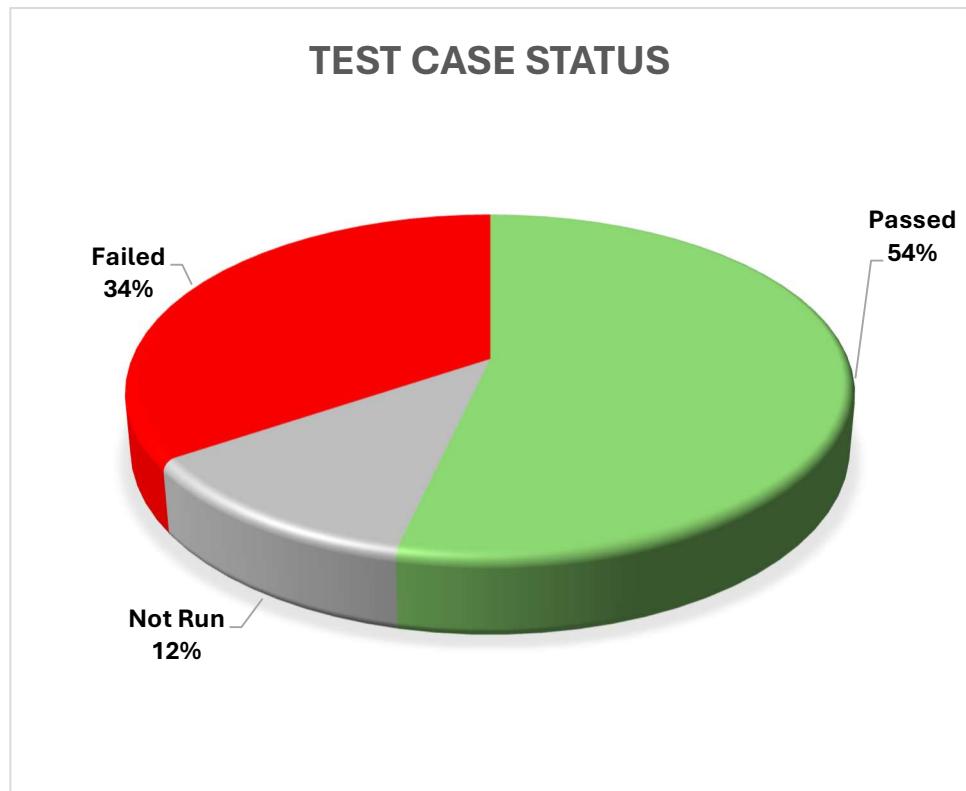

- ✓ מסך ראשי
- ✓ ביטוח רכב
- ✓ ביטוח נסיעות בחו"ל
- ✓ ביטוח דירה
- ✓ ביטוח בריאות וחימ
- ✓ שירות לקוחות
- ✓ קריירה ב Wobi

## Metrics

Different graphs and calculations for the test case and also for the amount of bugs and their severity

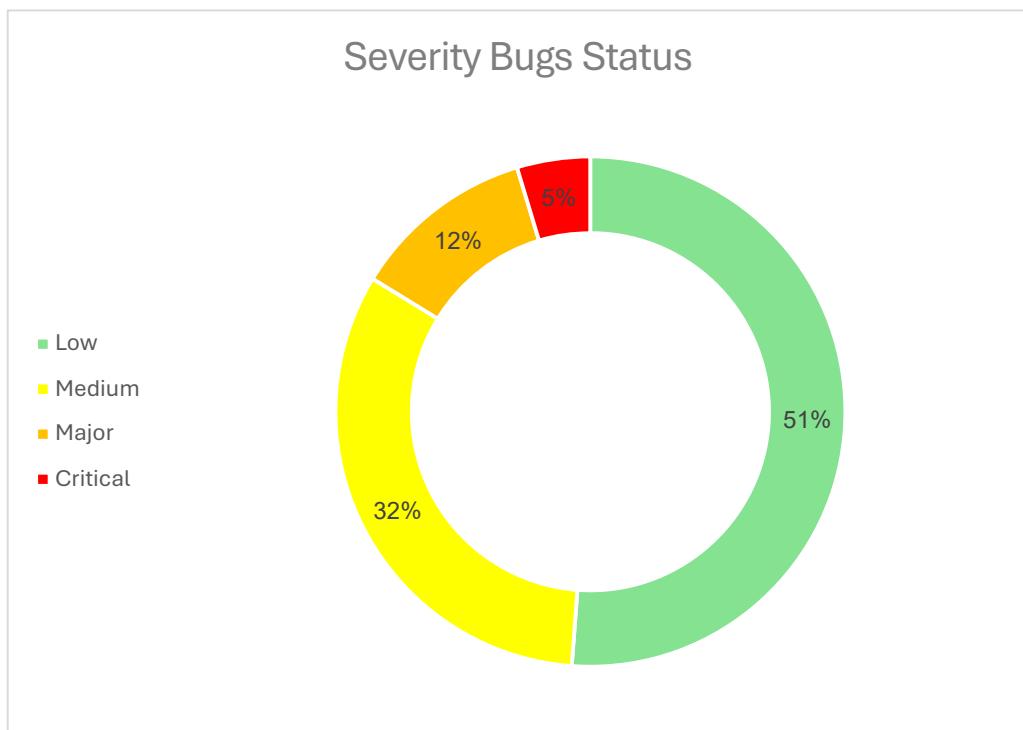

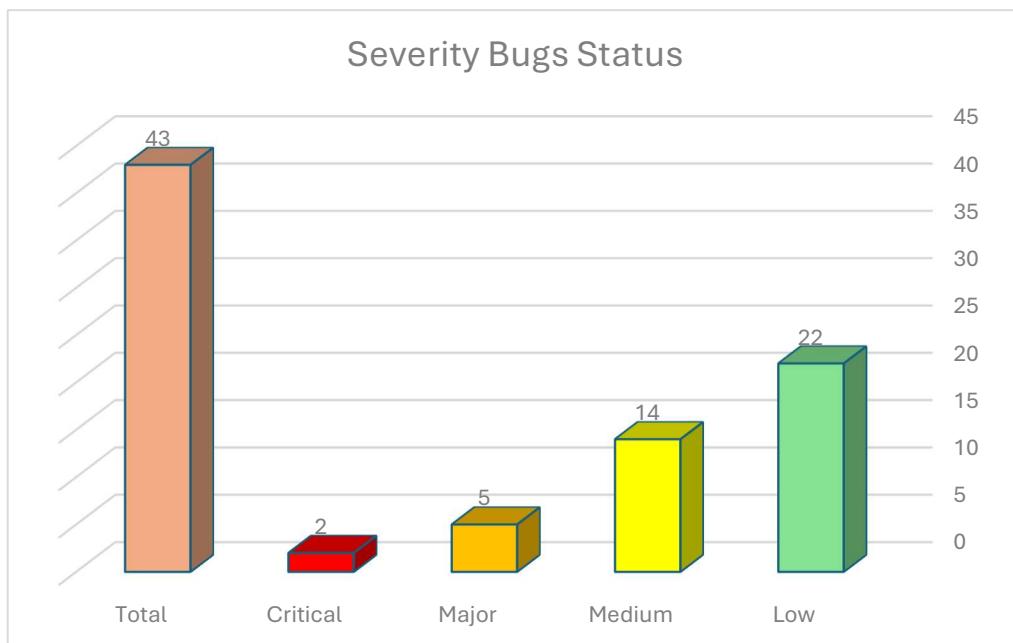

### Test Case Status

Passed	Failed	Not Run	Total
67	43	15	125

## Severity Bugs Status

Critical	Major	Medium	Low	Total
2	5	14	22	43

## Recommendations

1. Strengthen the usability of the website so that things like: error messages are issued in the right place and in addition that the error messages are clear and understandable to the user.
2. That the icons will work in the normal and proper way, the same for links
3. Improve the website's visibility, for example: uniform font, clearer and larger icons  
That icons do not interfere with reading texts or while scrolling, to reduce large and empty areas on the site
4. Fix the critical bugs on the site

## Conclusion

After a round of tests we have carried out, we have come to the conclusion that the **current version cannot be released** until the critical bugs have been fixed.
